

FDA Health Claims Audit Report

Website: True Hemp Science

Date: 2023-08-30

This report summarizes the findings of an automated review of the content on the website True Hemp Science for compliance with FDA guidelines on health claims related to products containing CBD or cannabis-derived compounds.

Findings:

The automated review did not find any direct health claims in the website content. This is a positive sign for compliance with FDA guidelines. However, it is important to note that the absence of direct health claims in an automated review does not guarantee full compliance. A manual review by legal experts specialized in FDA regulations is strongly recommended for complete assurance.

Conclusion and Recommendation:

Given the absence of direct health claims in the automated review, the website appears to be on the right track for compliance. However, for complete assurance, a manual review by specialized legal experts is advised. Potential areas of concern could include indirect implications or phrases that could be interpreted as making a health claim.
